

## Time is in favor of the bad guys!

Let's face it.....

The bad guys have the advantage! On average, a burglar or vandal has at least eight minutes to do what they need to do before law enforcement even gets the call!

That's better than four times more than a good smash and grabber needs to accomplish their objective and to be long gone before law enforcement receives the call.

We decided to do something about it through the development of a family of products that we call CrookCatcher! We have been developing and refining variations of the CrookCatcher over the past several years working with the Investigations Divisions of the Cullman and Evergreen Police Departments in Alabama as well as the Wake County Sheriff's Department in North Carolina.

On the following page, we have listed five of the most popular configurations. The CrookCatcher models are specifically for stakeout use by your department. The Companion Models are for making your community safer for those you serve. They are efficient, affordable and FAST. All have the ability to INSTANTLY transmit and alert message directly by 2-way radio to your dispatch center, to select users, or to every radio-equipped officer in the department!

CrookCatcher can shift the odds for you and those you serve. If you would like a demonstration, please call me personally at 1.800.489.2611 Extension 22 or my cell phone – 205.422.2011.

*Burch H. Falkner*

At your service!

### CrookCatcher MD

CrookCatcher MD is a special package for law enforcement investigative units. This is a complete unattended surveillance package for in-building use. The Central Processing Unit contains your choice of a VHF or UHF radio transmitter and a voice announcer unit. When activated, the “MD” model will transmit a location alert. Two remote wireless sensor units are included – 1 door switch and 1 motion sensor. Your price is just \$1,295! Additional information at [www.falcon4u.com/CCS.html](http://www.falcon4u.com/CCS.html).

### CrookCatcher VS

CrookCatcher VS is for outside use – specifically for detecting vehicles entering or existing the premises. This weatherproof battery operated unit can be placed by the side of a road, covered with leaves and left there for MONTHS! The VS can detect virtually any vehicle and automatically send an alert message via VHF or UHF 2-way radio. For a very interesting story of how a broadcast station and a Sheriff’s department worked together to stop vandalism at [www.info4u.us/WRALpr.pdf](http://www.info4u.us/WRALpr.pdf). The price is only \$674 complete including programming on your VHF or UHF radio frequency with custom message.

### Companion ST

Several years ago, we were asked to develop a wireless emergency calling system for courtroom use. Over time, this technology has improved and cost has come down. Today, we offer a wireless calling system known as SafeTalker. It is basically for use in schools, supported by local law enforcement. We urge your participation in this program. Additional information is available at [www.info4u.us/stl.pdf](http://www.info4u.us/stl.pdf).

### Companion QA2

A personal emergency calling button system has been developed for use by the merchant community. These systems require no phone lines, third party answering services or monthly usage charges. They are ideal for use in high-risk business establishments. The cost to the merchant is only \$699 for the standard model. Originally developed for the Evergreen Alabama Police Department, the plan details are on request. More information is available at <http://www.info4u.us/Companion.pdf>.

### Companion QU4

Our latest system, QU4, is now available to provide enhanced notification capabilities in public buildings, churches, and other high-risk locations. This system provides a wireless call button, intrusion, and smoke detection, or any combination of these sensors. Additional info is available at [www.info4u.us/qu4](http://www.info4u.us/qu4).

### Other Law Enforcement Products

If you have a need in law enforcement electronics, there is only one name you need to know – OURS! Additional information on radios, in-car cameras, specialized electronics, replacement batteries, and much, much more is available at [www.falcondirect.com/lawspecials](http://www.falcondirect.com/lawspecials). Check us out - you’ll be glad you did!
